Our WAY

ABOUT US

We have been creating **RADKA** company responsibly and gradually for more **30 years**. Although the company is based on tradition, we are not opposed to new trends. We are a **proud family company** with Czech capital, organized in a holding structure, gradually expanding our activities outside the Czech Republic. Our global **RADKA World** already includes **8 separate RADKA companies operating in 16 countries** of the world.

Our MISSION

For almost three decades of existence, we have grown into stable and project-oriented partner in the segment of engineering thermoplastics and other polymers distribution. We are one of the market leader in the territory of CEE countries. Together with our suppliers we form a strong team able to be a partner to meet variety of your needs and goals. Our mission is to offer new, creative and cost-effective solutions for wide range of industrial application, reflecting the current level of market knowledge and expectations.

We are fully aware of the actual challenges related to sustainable development in the field of plastics production and processing. The offered portfolio of materials dynamically reflects this trend and thus fulfils the vision of circular economy principles.

Vision STATEMENT

Sustainable development on the planet is also possible with further meaningful use of plastics.

Our VISION

Have the courage to look for innovative new solutions that do not burden the natural environment and prioritize these in all our activities.

Respect and develop the specifics of individual countries within the territory where we operate.

Offer the highest possible quality and effectivity in the distribution of plastics.
